

WORK EXPERIENCE

CTO

Citibeats - March 2020 to Present

After two years of working as a freelance, I joined Citibeats as CTO to help the company set the guides to face the tech and development challenges.

CHIEF R+D OFFICER

Inbenta - November 2007 to October 2017

Starting as a Developer, I learned and grew until becoming the leader of a team focused on AI and Natural Language processing. **The team expanded from 3 to 70 people**, some of whom I recruited myself.

During these years, I contributed to design & develop the NLP engine the company still uses nowadays. I also implemented Git, Agile methodology, QA, TDD, CI, and other software development practices.

CTO & CO-FOUNDER

Bitrabajo - January 2013 - August 2014

Bitrabajo was a freelance micro service start-up, very similar to Fiverr that I co-founded with a childhood friend of mine.

After launching the site, we reached the media (press, radio & television) and got **over 1000 active users in less than 6 months**.

EDUCATION

TELECOMMUNICATIONS ENGINEERING

UAB (Universitat Autònoma de Barcelona) 2006-2011

LANGUAGES

- English: business proficiency level
- Spanish: native
- Catalan: native

MARC GARCÍA MARTÍNEZ

SOFTWARE RESEARCH &
DEVELOPMENT MANAGER

During the last 10 years, I've been working in the research & development of AI and Natural Language processing. I started as a programmer and became manager over the years. I also launched my own startup some years ago.

SOFTWARE DEVELOPMENT CASE STUDIES

Here you'll find two case studies of challenges I found during my career and how did I face them, and which results obtained.

CASE STUDY #1

MANAGING MULTIPLE DEVELOPMENT TEAMS

How I managed a growing development team (from 3 to 70 people) while keeping milestones and assuring code & product quality.

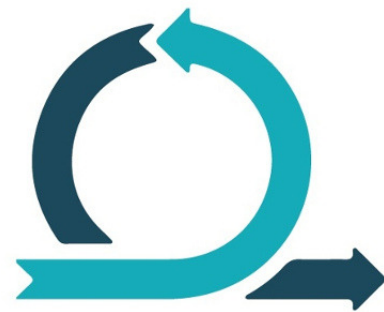

[Read more](#)

CASE STUDY #2

EMBRACING AGILE PRINCIPLES

How I successfully implemented Agile principles within several development teams.
